Personal statement: I am a creative professional with a fair amount of knowledge and skill in the fabrication industry With a hunger for more technical knowledge and I am always striving for perfection.

JNJ Well Services, Casa Grande— Operator Trainee

July 2020 - PRESENT

At JNJ I assist the operator in all well drilling and cleaning operations. Which generally includes setting up tools, greasing rig, lining up and welding well casing, verifying depths, drilling and bailing.

“To explain my short term employment. I have been welding and fabricating for 7 years, and I’ve wondered if I would enjoy something as much as I enjoy welding. I had an opportunity come up for a potential long term opportunity with JNJ but my passion is in welding and fabricating”

Fine Line Fabrication, North phoenix— Welder Fabricator

March 2017 - July 2020

At Fineline Fabrication I was a welder fabricator. My main responsibilities were to fabricate incoming jobs. Normally the jobs would go through layout prior to me where they would be laid out, cut and formed. Then I would verify that everything was formed or cut to the engineering drawings then I would then select the proper procedure to fabricate the job at hand. Depending on the job at hand I would work on the job individually or as part of a team.

Contrivance, Phoenix— Welder Team Lead

January 2015 - March 2017

At Contrivance I started as a production line welder, I was quickly given the opportunity to lead a team of a few welders and a couple helpers. After about a year a position came up in the Cryogenic department where I was able to hone in my tig welding skills and get my pressure vessel certification.

Trail Boss, Tolleson— Welder Fabricator

August 2013 - January 2015

At Trail Boss my main responsibility was to fabricate all the doors, gates and ramps according to the shop drawings. When I was caught up with my responsibilities I would assist my co-workers in their stations including sheeting, laminating, painting, finishing, repairs and wiring 12volt lighting.
