

ACO Drain® KlassikDrain K200/KS200

8" Internal Width General Purpose System

- 
- DrainLok & QuickLok® Grate Locking Options
 - Integral Galvanized or Stainless Steel Edge Rail
 - Wide Choice of Grates
 - Interconnecting End Profiles
 - Polymer Concrete Channel
 - System Numbering
 - Adjacent Channel Numbering
 - Profiled Side Walls
 - Knockouts for Pipe Connections
 - Installation Devices Available
 - Sloped (0.5%) Channel Units

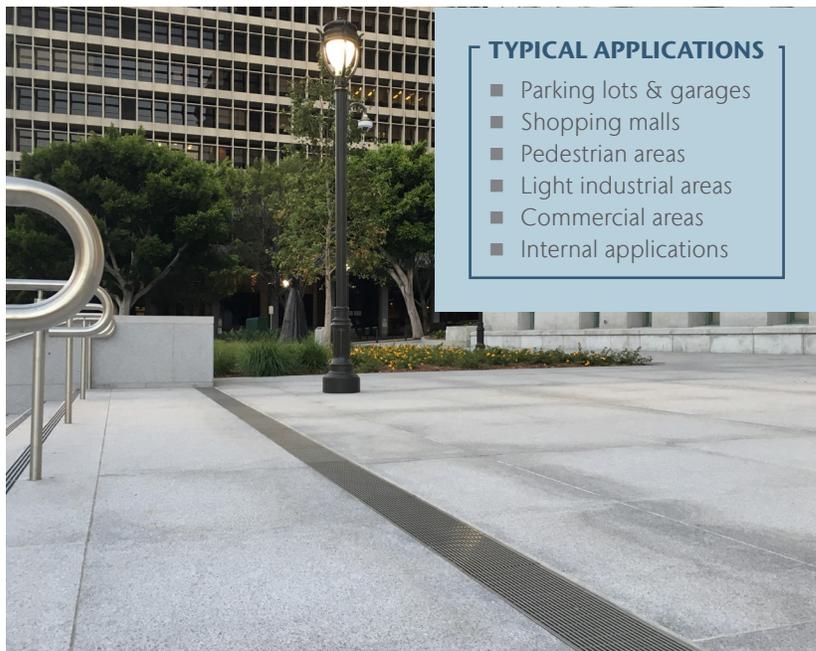

K200 is an 8" wide sloping system with a galvanized steel edge rail and a broad choice of grates in different materials and slot styles up to Load Class E (60 ton) featuring either patented DrainLok or QuickLok® boltless locking systems.

KS200 is the same system, but the edge rail is grade 304 stainless steel and should be used where increased aesthetics or increased corrosion resistance is required.

For heavy duty applications, see ACO PowerDrain® product line.

Loading class is grate-dependent.

TYPICAL APPLICATIONS

- Parking lots & garages
- Shopping malls
- Pedestrian areas
- Light industrial areas
- Commercial areas
- Internal applications

ACO Drain®

KlassikDrain K200/KS200

8" Internal Width General Purpose System

DRAINLOK - BOLTLESS & BARLESS LOCKING SYSTEM

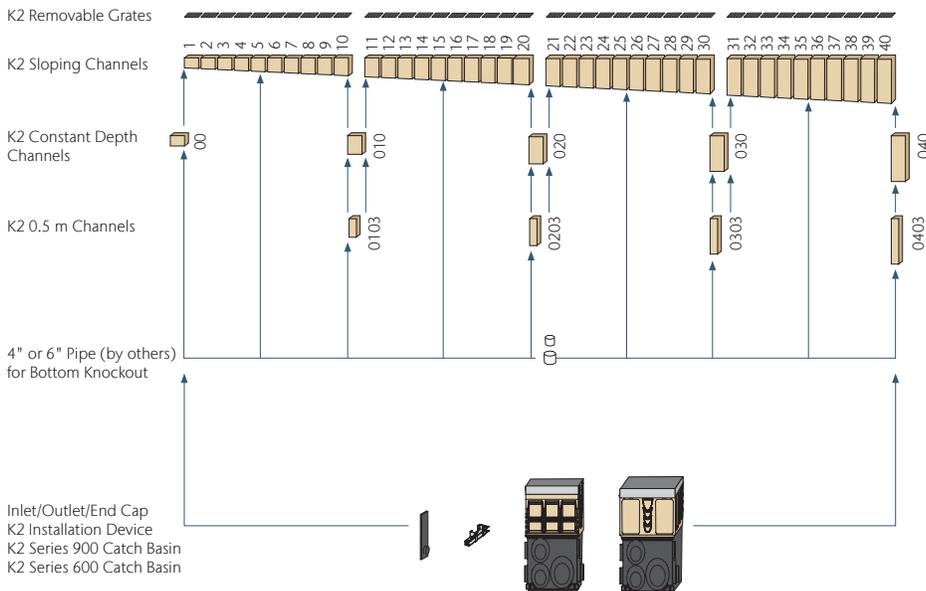

Factory-fitted locking device removes need for bolts and bars and improves channel hydraulic capacity. The DrainLok mechanism clips into channel edge rail for rapid installation. DrainLok grates are fit with an anti-shunt mechanism that restricts unwanted grate movement when installed, improving durability and longevity of the system.

QUICKLOK® - BOLTLESS LOCKING SYSTEM

QuickLok® is a patented, boltless locking system offering quick fitting and removal of grates. Use of QuickLok grates reduces installation and maintenance time and cost. Grates are supplied with a QuickLok locking stud which push-fits into a stainless steel spring clip in the QuickLok locking bar.
