Specification Summary

General

The surface drainage system shall be ACO Qmax 600 with Galvanized Steel Q-Guard top as manufactured by ACO, Inc. or equal approved.

Grates

Grates shall be factory fitted to MDPE bodies to provide a monolithic unit. Water intake area per 2 meter unit will be 25.90 in² (16,712 mm²)

Catch Basin

See appropriate spec info for catch basin information.

Installation

The trench drain system shall be installed in accordance with the manufacturer's installation instructions and recommendations.

Materials

The trench system bodies shall be manufactured from medium density polyethylene with:

- Compressive strength: 8,450 psi
- Flexural strength: 2,224 psi
- Water absorption 0.31%

The nominal clear opening shall be 23.62" (600 mm) with unit overall width of 33.86" (860 mm). Units shall be manufactured with a neutral invert of 45.47" (1155 mm). Each unit will feature a full radius in the channel bottom and a male to female interconnecting end profile, a rubber seal shall be fitted to the bell end of the channel unit. Units shall have molded anchoring features on the outside wall to ensure maximum mechanical bond to the surrounding bedding material and pavement surface.

EN 1433 Load Class C
56,202 lbs — 1,160 psi
